Student Enrollment & Course Management System (SECMS)

User Story:

The Student Enrollment & Course Management System is a comprehensive Salesforce application designed to streamline and automate the academic enrollment operations of an educational institute. This system enables administrators, enrollment officers, and instructors to efficiently manage student records, course offerings, enrollments, instructor assignments, approval processes, payments, and reporting—all within a unified Salesforce environment.

1. INTRODUCTION

1.1 Project Overview:

This project aims to centralize all student, course, and enrollment-related data within a single Salesforce application to ensure easy data access, structured workflows, and accurate reporting. The system allows Enrollment Officers to manage student admissions, course registrations, and communication effectively, while instructors and administrators gain full transparency into course allocations and academic progress. The solution also enables automated instructor assignment, task creation, validation checks, and multi-level approval processes for enrollment management.

With Salesforce Flows, Approval Processes, Validation Rules, Reports, and Dashboards, the organization can ensure that all enrollment operations—from admission to course completion—are handled systematically and with continuous monitoring of key performance indicators such as enrollment volume, revenue, student status distribution, and pending approvals.

SECMS — Student Enrollment and Case Management System

1.2 Purpose :

The primary purpose of SECMS is to replace manual and fragmented enrollment processes with a scalable, automated, and secure Salesforce solution that ensures:

- Accurate student data management
- Structured enrollment workflows
- Automated approvals and validations
- Transparent reporting and monitoring

Phase 1: Brainstorming & Ideation Phase

Student Enrollment & Course Management System

1. Problem

- Manual student admission is time-consuming and error-prone
- Course allocation process is manual and inefficient
- Instructor assignment has frequent errors and delays

2. Idea

- Build a unified Salesforce application to automate enrollment
- Centralize student, course, and instructor management
- Streamline processes into a single digital platform

3. Objectives

- Student management
- Course management
- Auto enrollment
- Instructor assignment
- Approval workflow
- Payment tracking
- Reports & analytics

4. Stakeholders

- Admin — System oversight & configuration
- Enrollment Officer — Manage admissions & enrollments
- Instructor — Course delivery & grading
- Student — Course selection & payment

5. Tools Identified

- Salesforce Platform — Core CRM & automation
- Custom Objects — Student, Course, Enrollment, Payment
- Flow — Automate enrollment & approvals
- Approval Process — Multi-level approval routing
- Reports & Dashboards — Real-time monitoring

6. Outcomes

- Zero manual errors in enrollment process
- Faster enrollment and course allocation
- Automated task creation & notifications

2.1 Problem Statement (Customer Problem Statement Template) - 4 PS

Student Enrollment & Course Management System

Document: PS-TEMPLATE-2.1 | Version: 1.0 | Date: 2024-01-15

PS No	I am (Customer/Person)	I'm trying to	But	Because	Which makes me feel
PS-1	Enrollment Officer	manage student enrollments efficiently	enrollment data is scatterred	systems are manual and unintegrated	frustrated and error-prone
PS-2	Administrator	track enrollments and revenue	reporting is delayed	data is not centralized	uncertain in decision-making
PS-3	Student	enroll in courses quickly	admission process is time-consuming	manual verification and no auto assignment	anxious and confused
PS-4	Instructor	manage assigned courses and students	student allocation is unclear	no auto instructor assignment (INSTR_A/B/C) and no dashboard	overloaded and disconnected

Note: The 4 PS capture key stakeholder challenges to inform system requirements and design improvements for the Student Enrollment & Course Management System.

2.2 Empathy Map - Enrollment Officer & Administrator

Student Enrollment & Course Management System — Empathy Mapping for Key Roles

PS-1 • Enrollment Officer

Says:
I need to manage hundreds of student records daily

Thinks:
Why is data scattered in Excel?

Does:
- Manually enters data.
- Calls students for follow-up

Feels:
- Frustrated
- Error-prone
- Overloaded

PS-2 • Administrator

Says:
I need real-time enrollment reports

Thinks:
Where is the revenue data?

Does:
- Waits for reports
- Checks multiple sheets

Feels:
- Uncertain
- Delayed decisions

Pain Points:
- Duplicate entries
- Approval bottle-neck
- No auto task
- No instructor assignment

Gains:
- Automation
- Dashboard
- Zero errors
- TODAY{+2 follow-up task
- Auto INSTR_A assignment

Purpose: Identify pain points & desired gains to guide system design for streamlined enrollment & reporting

2.2 Empathy Map - PS-3 and PS-4

Student Enrollment & Course Management System

PS-3 — Student

SAYS

- "I want to enroll quickly without long waiting"
- "What is the status of my application?"

THINKS

- "Will my admission get confirmed on time?"
- "Is my payment received?"

DOES

- "Fills forms manually, visits office multiple times"
- "Waits for confirmation call"

FEELS

- "Anxious, confused, frustrated"
- "Due to time-consuming manual verification and no auto assignment"

PS-4 — Instructor

SAYS

- "Which students are assigned to my course?"
- "I need a clear student list"

THINKS

- "Student allocation is unclear, how many students do I have?"
- "Where is my dashboard?"

DOES

- "Waits for admin email, checks scattered sheets"
- "Manually tracks students"

FEELS

- "Overloaded, disconnected, unclear"
- "Because no auto instructor assignment and no dashboard"

Pain Points

- Time-consuming admission
- Unclear allocation
- No dashboard
- Manual verification

Gains

- Automated enrollment
- Clear assignment
- Real-time dashboard
- Faster confirmation

Summary: Streamlining enrollment & course management through automation, transparency, and real-time updates | Document Version 1.0
