3.1 Customer Journey Map - Student Enrollment & Course Management System (SECMS)

3.3 Data Flow Diagram - Student Enrollment & Course Management System (SECMS)

- User inputs student and enrollment data
- System validates and stores records
- Approval process routes data
- Reports and dashb ords consume processed data

3.2 Solution Requirements

for SECMS

Functional Requirements

FR No	Epic	Description
FR-1	Student Management	Manage student records
FR-2	Course Management	Create and manage courses
FR-3	Enrollment Processing	Request, approve, reject enrollments
FR-4	Instructor Assignment	Auto-assign instructors
FR-5	Reporting	Dashboards and reports

Non-Functional Requirements

NFR-1 Usability The system shall provide a simple, intuitive, and user-friendly interface that enables enrollment officers, administrators, instructors, and students to perform operations efficiently, with minimal training. Navigation shall be organized through clearly labeled tabs, dashboards, and forms to reduce user effort and errors.

Examples: Quick student registration form; One-click enrollment approval; Role-based dashboards.

NFR-2 Security The system shall ensure the confidentiality, integrity, and protection of student and institutional data through secure authentication, authorization, and access controls. Sensitive information such as personal data, enrollment history, and academic records shall only be accessible to authorized users.

Examples: Only admins can modify course details; Instructors view only assigned students; Students cannot access other student records.

NFR-3 Reliability The system shall operate consistently and accurately without failures during enrollment processing, approvals, and reporting. Automation logic shall execute correctly to avoid duplicate or incorrect enrollments.

Examples: No duplicate course registration; Accurate status updates after approvals; Consistent report generation.

NFR-4 Performance

Requirement: The system shall provide fast response times for all operations to ensure smooth and uninterrupted user experience, especially during peak admission periods.

Examples:

- Quick dashboard refresh
- Fast search for student records
- No lag during bulk uploads

NFR-5 Scalability

Requirement: The system shall support future growth in the number of students, courses, departments, and users without degradation in performance or functionality. It shall allow easy addition of new modules and features.

Examples:

- Add new departments without redesign
- Handle increased admissions annually
- Extend to mobile or portal integration

NFR-6 Availability

The system shall be continuously accessible to users during institutional working hours and must minimize downtime. The platform shall support high availability for academic operations.

3.4 Technology Stack

The table below outlines the technology stack adopted for the SECMS implementation.

Layer	Technology
UI	Salesforce Lightning
Logic	Salesforce Flows
Database	Salesforce Objects
Automation	Validation Rules, Approval Process
Reporting	Reports & Dashboards
