6. Project Testing — Performance Testing

Document Section: Project Testing | Page 1 of 1 | Version 1.0 | Date: September 2025

Section 1: Functional Testing Summary

During testing, screenshots were captured from the Salesforce UI to verify the proper functioning of all features. The functional testing process involved validating core user workflows, data retrieval, dashboard interactions, and reporting modules to ensure system reliability and accuracy. All features were tested against the defined requirements, with no critical defects identified. The testing confirms that the application operates as expected across the student management and reporting modules.

Section 2: Test Results

Test Case	Module	Result
TC01	Students by Status Report	✅ Pass
TC02	Student Management Dashboard	✅ Pass

Section 3: Screenshots

The following figures illustrate the captured screenshots from the Salesforce UI during performance and functional testing.

Figure 1: Students by Status Report

[Placoholder: Bar chart showing 4 active records. X-axis: Status groups (Active). Y-axis: Student Count. Chart displeys 4 active records.]

Figure 1 — Bar chart visualization confirming 4 active student records.

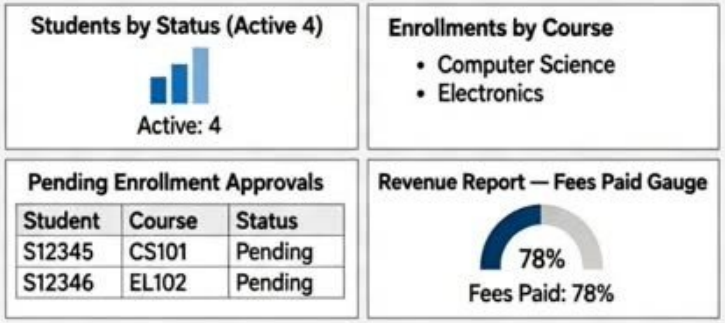

Figure 2: Student Management Dashboard

Figure 2 — Dashboard overview showing 4 key components as captured from the Salesforce UI.
