Communication.pdf

Communication Method for SECMS Project

The team communicated exclusively through WhatsApp.

A dedicated WhatsApp group was created named "SECMS Project Team" including all members:

- N.Sahanas Ruhi (Team Lead)
- S.Ayesha Suhaina
- R.Ragavi
- G.Anupriya

All project discussions, task assignments, file sharing, doubts clarification, meeting schedules, demo rehearsals, and GitHub updates were communicated via WhatsApp only. No other platforms were used for communication.

Advantages:

- Instant communication — immediate messaging enabled fast coordination and timely responses.
- Easy file sharing — documents, images, and project files were shared directly within the group without barriers.
- Quick doubt clearance — team members received prompt answers and clarified issues quickly through the group chat.

Demonstration of Proposed System.pdf

Prepared for Academic Demonstration • Date: 2024

System Overview:
SECMS built on Salesforce platform with 4 custom objects: Student__c, Course__c, Instructor__c, Enrollment__c.

Demo Flow:

Phase 1 — Developer Account:
- S.Ayesha Suhaina

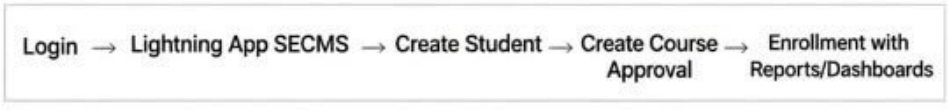

Backend:
- Objects: N.Sahanas Ruhi
- Fields: R.Ragavi
- Creating Relationship: G.Anupriya
- Validation rules: R.Ragavi
- Approval process: S.Ayesha Suhaina

Phase 3 — UI & Configuration:
- Tabs: N.Sahanas Ruhi
- Lightning App: G.Anupriya
- Page layout: S.Ayesha Suhaina

Phase 4 — Automation & Analytics:
- Automation with Flow: R.Ragavi
- Report: N.Sahanas Ruhi
- Dashboard: G.Anupriya
- Security setup: S.Ayesha Suhaina

Phase 5 — Conclusion:
- N.Sahanas Ruhi

Demonstrate End-to-End Process:

Note: All phases executed within Salesforce Developer Environment to showcase secure, automated student enrollment management system (SECMS).

Scalability and Future Plan.pdf

Current Scalability:

- Salesforce cloud handles 500+ students
- 100+ courses, concurrent enrollments
- Scalable storage
- Role-based security

Limitations:

- Licensing dependency
- Developer org storage limits

Future Plan:

- Payment Gateway Integration (Razorpay/PayPal)
- Student Self-Service Portal using Experience Cloud
- Analytics-Driven Insights with Einstein Analytics for course demand prediction
- Mobile Access Support via Salesforce Mobile App
- AI Chatbot for enrollment queries
- Automated Certificate Generation

Roadmap:

1. Phase 1 — 2024: Current SECMS (Objects, Flows, Reports)
2. Phase 2 — 2025: Payment + Portal + Mobile
3. Phase 3 — 2026: Analytics + AI Chatbot

Team Involvement in Demonstration.pdf

Team Members:
S.Ayesha Suhaina, N.Sahanas Ruhi, R.Ragavi, G.Anupriya.

Detailed Involvement:
Phase 1 — Creating developer account - S.Ayesha Suhaina.
Backend:

- **Objects - N.Sahanas Ruhi**
- **Fields - R.Ragavi**
- **Creating Relationship - G.Anupriya**
- **Validation rules - R.Ragavi**
- **Approval process - S.Ayesha Suhaina**

Phase 3 —

- **Tabs - N.Sahanas Ruhi**
- **The Lightning App - G.Anupriya**
- **Page layout - S.Ayesha Suhaina**

Phase 4 —

- **Automation with flow - R.Ragavi**
- **Report - N.Sahanas Ruhi**
- **Dashboard - G.Anupriya**
- **Security setup - S.Ayesha Suhaina**

Phase 5 — Conclusion - N.Sahanas Ruhi

Contribution Summary Table:

Team Member	Contribution	Percentage
S.Ayesha Suhaina	Phase 1, Backend Approval process, Page layout, Security setup	25%
N.Sahanas Ruhi	Backend Objects, Phase 3 Tabs, Phase 4 Report, Phase 5 Conclusion	25%
R.Ragavi	Backend Fields, Validation rules, Phase 4 Automation with flow	25%
G.Anupriya	Backend Creating Relationship, Phase 3 Lightning App, Phase 4 Dashboard	25%

Summary:
All four members contributed equally to the project, each accounting for 25% of the total effort. All members participated in demo rehearsal and final presentation.
